APPLE INC.,

Opposer,

v.

3.14 ACADEMY INC.,

Applicant.

**CONSOLIDATED NOTICE OF
OPPOSITION**

APPLE INC. (“Opposer” or “Apple”), a California corporation with a principal place of business at One Apple Park Way, Cupertino, California 95014, will be damaged by the issuance of registrations for the trademarks shown in Application Serial Nos. **88/527,558** and **88/527,569** (“Applicant’s Marks”) for the services identified in Class 41 and hereby opposes the same.

As grounds for its opposition, Apple alleges as follows, with knowledge concerning its own acts, and on information and belief as to all other matters:

FACTS

1. Apple is the world-famous designer, manufacturer, and marketer of mobile communication and media devices and personal computers, and seller of a variety of related software, services, accessories, and third-party digital content and applications. Apple's APPLE brand is one of the best-known brands in the world.

2. Since at least as early as 1977, Apple has extensively promoted, marketed, advertised, distributed, and sold goods and services in connection with a family of trademarks consisting, in whole or in part, of the word APPLE or its graphic equivalent, the Apple Logo (shown below) depicting a stylized apple with a detached leaf (collectively, the "Apple Marks").

3. Apple's family of Apple Marks are distinctive, arbitrary, and fanciful marks that have achieved an extraordinary level of fame and consumer recognition. As a result of Apple's extensive advertising, promotion, and use of the Apple Marks in connection with a variety of goods and services, the Apple Marks have acquired enormous goodwill, and are recognized immediately as identifying Apple's APPLE-branded goods and services.

4. The Apple Marks are famous and distinctive within the meaning of Section 43(c) of the Lanham Act, 15 U.S.C. § 1125(c). The extraordinary level of fame and consumer recognition that the Apple Marks currently enjoy cannot be seriously disputed.

5. For many years, Apple's APPLE brand (including the Apple Logo) has consistently been recognized as one of the world's most famous brands. In May 2019, *Forbes* magazine ranked the APPLE brand as the world's most valuable brand for the ninth year in a row, with an estimated valuation of \$206 billion. Attached as **Exhibit 1** are printouts of *Forbes* magazine articles

regarding its list of the most valuable brands from 2019, 2018, 2017, 2016, 2015, 2014, 2013, 2012, and 2011, obtained from its website.

6. In 2019, for the eighth consecutive year, Apple won the *Harris Interactive* “Brand of the Year” award in the tablet computer category. Apple was also named the #1 brand in the smart phone category and the virtual personal assistant category. Attached as **Exhibit 2** is a printout of the *Harris Interactive* report obtained from the website at <https://theharrispoll.com/the-harris-poll-announces-this-years-brands-of-the-year/>.

7. Additionally, Interbrand has consistently recognized the APPLE brand in the top 50 of its “Best Global Brands” annual rankings, increasing in value each year. After being named the second most valuable brand in the world in 2012, the next year the APPLE brand was ranked as the most valuable, and Apple has maintained that top position every year since (2013-2019). Attached as **Exhibit 3** are copies of relevant pages of Interbrand’s “Best Global Brands” rankings from 2010 through 2019, in reverse chronological order. Interbrand has awarded the APPLE brand the following rankings and brand valuations over the past 10 years:

- (a) 2019: valuing the APPLE brand as the most valuable brand in the world, with an estimated worth of U.S. \$234.24 billion;
- (b) 2018: valuing the APPLE brand as the most valuable brand in the world, with an estimated worth of U.S. \$214.48 billion;
- (c) 2017: valuing the APPLE brand as the most valuable brand in the world, with an estimated worth of U.S. \$184.15 billion;
- (d) 2016: valuing the APPLE brand as the most valuable brand in the world, with an estimated worth of U.S. \$178.12 billion;
- (e) 2015: valuing the APPLE brand as the most valuable brand in the world, with an estimated worth of U.S. \$170.28 billion;
- (f) 2014: valuing the APPLE brand as the most valuable brand in the world, with an estimated worth of U.S. \$118.86 billion;

- (g) 2013: valuing the APPLE brand as the most valuable brand in the world, with an estimated worth of U.S. \$98.32 billion;
- (h) 2012: valuing the APPLE brand as the 2nd most valuable brand in the world, with an estimated worth of U.S. \$76.57 billion;
- (i) 2011: valuing the APPLE brand as the 8th most valuable brand in the world, with an estimated worth of U.S. \$33.49 billion; and
- (j) 2010: valuing the APPLE brand as the 17th most valuable brand in the world, with an estimated worth of U.S. \$21.14 billion.

8. In 2019, leading market research and brand valuation company Millward Brown Optimor (“MBO”) named APPLE as the most valuable brand in the United States in its “Brandz™ Top 100 Most Valuable U.S. Brands” annual rankings. Last year, the inaugural year of MBO’s U.S. rankings, APPLE was named the second most valuable brand in the United States. Copies of MBO’s 2019 and 2018 “Brandz™ Top 100 Most Valuable U.S. Brands” annual rankings are attached as **Exhibit 4**.

9. Moreover, over the past 12 years, MBO has named APPLE as one of the world’s top brands in its “Brandz™ Top 100 Most Valuable Global Brands” annual rankings. In MBO’s 2019 rankings, Apple’s APPLE brand was ranked the second most valuable brand in the world with a value of \$309.5 billion. In MBO’s 2018 rankings, Apple’s APPLE brand was ranked the second most valuable brand in the world with a value of \$300.6 billion. In MBO’s 2017 rankings, Apple’s APPLE brand was ranked the second most valuable brand in the world with a value of \$234.67 billion. The 2016 rankings also ranked Apple’s APPLE brand the second most valuable brand in the world with a value of \$228.46 billion. In 2015, MBO named Apple the world’s most valuable brand, a rank it also held in 2011, 2012, and 2013. Apple’s APPLE brand ranked 2nd in 2014, 3rd in 2010, 6th in 2009, and 7th in 2008, clearly demonstrating recognition of the APPLE brand as one of the world’s most valuable for more than a decade. Attached as **Exhibit 5** are

copies of relevant pages of MBO's rankings in reverse chronological order from 2019 through 2008.

10. In addition, market research company OnePoll named Apple's Apple Logo as the most instantly recognizable brand logo in the United States in 2019. Attached as **Exhibit 6** is a copy of OnePoll's ranking of top 30 most recognizable brand logos.

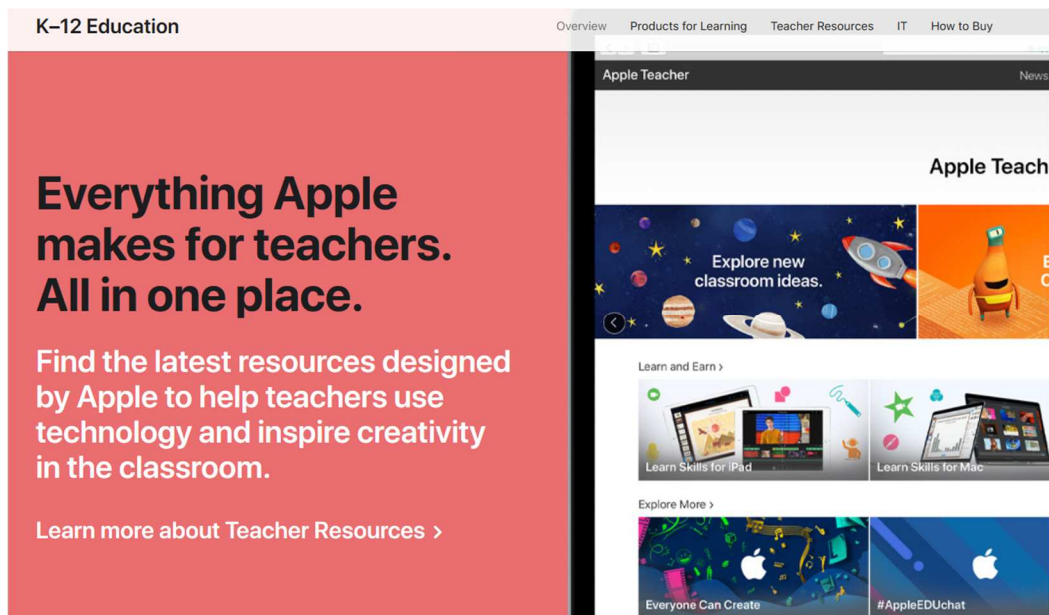

11. Apple also has been widely recognized as an extremely valuable, innovative, and admired company. Each year since 2006, *Fortune Magazine* has published its list of "Most Admired Companies." Apple has featured prominently in these rankings each year, and for 10 years in a row from 2009 to 2019, Apple has been named the "World's Most Admired Company" for the year. Before 2009, *Fortune Magazine's* list was limited to "America's Most Admired Companies," and Apple also topped that list in 2008. Attached as **Exhibit 7** are copies of printouts of relevant pages of *Fortune Magazine's* "Most Admired Companies" rankings in reverse chronological order from 2019 through 2008.

12. Apple has extensively used the Apple Marks in connection with goods and services in the field of education and, accordingly, has acquired broad common law rights with respect to such goods and services. For more than 40 years, the Apple Logo has been on Apple products provided in educational settings. As early as 1978, Apple won a contract to supply hundreds of Apple *II* computers, bearing the Apple Logo in colors, to U.S. schools. As far back as the early 1980s, Apple also donated thousands of Apple *Ile* computers, also bearing the Apple Logo in colors, to schools for educational use. In 1984, Apple first introduced its MAC computers to the classroom, providing teachers access to various platforms and educational software applications that help students learn and create. As Apple has grown and its products have evolved, so too has its involvement with education.

13. Indeed, Apple now provides educators and students with a vast array of technology products and services that are powerful educational tools, as detailed on its website at www.apple.com/education, screenshots of which are reflected below, and a printout of which is attached as **Exhibit 8**.

Ignite the creativity in every student.

14. Apple also provides educators with technology support services and resources, such as tips and lesson plans that use Apple's devices and software, to bring fresh ideas to the classroom. Educators and students of every level, from elementary, to secondary, to post-secondary school education, use Apple's wide array of software programs together with Apple's devices to aid the education process.

15. Further, Apple provides online educational services via the free ITUNES U software application, through which educators can create classes and tutorials and share them online with their students or with a global audience. Apple's ITUNES U application provides extensive course material for the creation of these courses. In addition, Apple's IPAD device is marketed to and used by educators to easily customize students' learning experience and make learning more interactive, with materials created by the educator through Apple's Classroom software application, IBOOKS AUTHOR software, and GARAGEBAND software for music education.

16. Moreover, since at least as early as July 2008, Apple's APP STORE online marketplace has featured education software applications that cover a wide range of subjects for every grade level and learning style. Within the 200,000 educational applications offered through Apple's APP STORE marketplace, including Apple's Classroom software application for Apple's IPAD device, there are numerous software applications geared specifically for teachers and students.

17. Apple has also joined the ConnectED initiative and pledged \$100 million of teaching and learning solutions to 114 underserved schools across the country, by donating an IPAD device to every student, a MAC computer and IPAD devices to every teacher, and an APPLE TV digital media extender to every classroom, and implementing a process that provides planning,

professional learning, and ongoing guidance. See initiative details at <https://www.apple.com/connectED/>, a printout of which is attached as **Exhibit 9**.

18. Apple also offers numerous educational and training services to professionals and others. Links to courses and certification programs provided by Apple Authorized Training Providers are available via Apple's website at <https://training.apple.com> (which also provides training course books, ebooks, and study guides). In connection with its courses and certification programs, Apple administers Apple certification exams and offers exam preparation under the Apple Marks in connection with its certification exams. See <https://training.apple.com/us/en/recognition>, a printout of which is attached as **Exhibit 10**.

19. Since 2001, Apple also has been offering education and training services at its APPLE STORE retail store locations, including classes, workshops, and seminars in the fields of computers, computer software, online services, information technology, internet website design, music, photography, video products, and consumer electronics. Apple has more than 270 APPLE STORE retail locations in the United States, providing these educational and training services daily around the country, including through its TODAY AT APPLE educational sessions at APPLE STORE retail locations offering customers a hands-on learning experience with Apple's products. See <https://www.apple.com/today/>, a printout of which is attached as **Exhibit 11**.

20. Apple owns numerous United States applications and registrations on the Principal Register for the Apple Marks, including, without limitation, the following:

True and correct copies of the registration certificates and printouts from the United States Patent and Trademark Office online database for the above-identified registrations are attached as **Exhibit 12.**

21. The above-identified registrations are valid and in full force and effect. Indeed, affidavits have been accepted, pursuant to Sections 8 and 15 of the Lanham Act, for U.S. Registrations Nos. 3,298,028; 3,710,912; 4,009,791; and 4,088,195.

22. On July 22, 2019, notwithstanding Apple's prior rights, and well after Apple's Apple Marks became distinctive and/or famous, 3.14 Academy Inc. ("Applicant") filed Application Serial Nos. 88/527,558 and 88/527,569 to register the following marks:

Appication Serial No. 88/527,558	Appication Serial No. 88/527,569
	

23. Applicant seeks to register Applicant's Marks in International Class 41, on an intent-to-use basis, for "Educational services, namely, providing in-person and on-line classes, seminars, lectures, courses, test preparation exercises and test preparation classes, all at the primary, secondary, post-secondary and graduate levels; producing continuing public service audio and video programs for distribution through podcasting and webcasting in the field of

education; electronic publishing of on-line interactive exercises in the nature of educational workbooks; providing educational services in the nature of courses and online courses in the fields of curriculum development and online teaching and learning” (“Applicant’s Services”).

24. Apple is timely filing this Consolidated Notice of Opposition and hereby opposes the registration of Applicant’s Marks on the grounds that: (a) Applicant’s Marks are likely to cause confusion, mistake, or deception under Section 2(d) of the Lanham Act, 15 U.S.C. § 1052(d); and (b) Applicant’s Marks are likely to cause dilution under Section 43(c)(1) of the Lanham Act, 15 U.S.C. § 1125(c).

FIRST GROUND FOR OPPOSITION
LIKELY TO CAUSE CONFUSION, OR TO CAUSE MISTAKE, OR TO DECEIVE

25. Apple hereby incorporates paragraphs 1-24 as if fully set forth herein.

26. There is no issue as to priority. Apple began using the Apple Marks in commerce at least as early as 1976, well prior to Applicant’s July 22, 2019 filing date.

27. Apple will be damaged by the registration of Applicant’s Marks in connection with Applicant’s Services because Applicant’s Marks so closely resemble the Apple Marks as to be likely to cause confusion, mistake, or deception in the minds of consumers as to the origin or source of Applicant’s Services or the affiliation between Applicant and Apple, in violation of Section 2(d) of the Lanham Act, 15 U.S.C. § 1052(d).

28. Consumers encountering Applicant’s Marks are likely to associate the marks with Apple because the marks contain a minimalistic apple with right-facing detached leaf design that readily calls to mind Apple’s famous Apple Logo and overall creates a similar commercial impression.

29. The Apple Marks are so famous and instantly recognizable that the similarities in Applicant's Marks will overshadow any minor differences and cause the ordinary consumer to believe that Applicant is related to, affiliated with or endorsed by Apple.

30. Since long before Applicant's filing date, Apple has offered identical and/or highly related goods and services under its Apple Marks. Specifically, (1) Apple has long offered under and/or owns multiple registrations for, and/or owns common law rights with respect to, its Apple Marks covering goods and services related to education and exam preparation, as well as podcasting and online courses in the field of education (*see, e.g.*, Apple's registrations identified in Paragraph 20 above and associated services highlighted in bold in that paragraph).

31. In light of the fame of the Apple Marks, consumers encountering Applicant's Marks are likely to believe Applicant's Services offered under Applicant's Marks are associated with, or approved, endorsed, or provided by Apple.

32. Lending further support to a finding of a likelihood of consumer confusion is the fact that Applicant's Services are not limited to any particular channel of trade. It must therefore be presumed that Applicant's Services will be offered through the same channels of trade as the goods and services covered by Apple's prior registrations.

33. Apple would be damaged by the registration of Applicant's Marks in connection with Applicant's Services because Applicant's Marks so closely resemble the Apple Marks that they are likely to cause confusion, mistake, or deception in the minds of consumers as to the origin or source of Applicant's Services, or the affiliation or connection between Applicant and Apple, in violation of Section 2(d) of the Lanham Act, 15 U.S.C. § 1052(d).

SECOND GROUND FOR OPPOSITION
DILUTION OF A FAMOUS MARK

34. Apple hereby incorporates paragraphs 1-33 as if fully set forth herein.

35. For years prior to Applicant's filing date, Apple has offered and become famous for the provision of software and other goods and services under its Apple Marks. *See, e.g., Apple Inc. v. Homer Martin Peavy*, No. 91229208, 2019 WL 5595078 (T.T.A.B. Sept. 30, 2019) ("... Opposer's very well-known APPLE mark ..."); *Apple Inc. v. Relix LLC Apple Corps Ltd. v. Relix LLC*, No. 78822935, 2012 WL 4460466 (T.T.A.B. Sept. 12, 2012) ("Based upon the evidence of record. . . we find that opposers have made an overwhelming showing that opposer Apple Inc.'s APPLE mark is famous. . . "); *Apple Inc. v. Echospin, LLC*, No. 91171592, 2010 WL 2783894 (T.T.A.B. June 29, 2010) ("The evidence clearly establishes that both the APPLE word mark and the APPLE design logo are famous marks.").

36. Apple will also be damaged by registration of Applicant's Marks because the marks are likely to cause dilution of the distinctiveness of the famous Apple Marks by eroding consumers' exclusive identification of the Apple Marks with Apple, and by otherwise lessening the capacity of the Apple Marks to identify and distinguish the goods and services of Apple, in violation of Section 43(c)(1) of the Lanham Act, 15 U.S.C. § 1125(c)(1).

37. Specifically, Applicant's Marks are likely to cause dilution by blurring of the famous Apple Marks based on a number of relevant considerations including, without limitation, the following:

(a) Applicant's Marks are highly similar in appearance, meaning, and commercial impression to Apple's famous Apple Marks;

(b) Apple's Marks are inherently distinctive and, due to Apple's extensive use and promotion, the Apple Marks also became famous prior to Applicant's filing date;

(c) Apple has engaged in substantially exclusive use of the Apple Marks; and

(d) the Apple Marks are famous and widely recognized by the general consuming public and has been widely recognized since long before Applicant's filing date.

38. If Applicant is granted the registrations herein opposed, it would thereby obtain a *prima facie* exclusive right to use Applicant's Marks in connection with Applicant's Services. Such registration would damage and injure Apple.

39. In light of Apple's prior rights in—and the fame associated with—the Apple Marks, Applicant is not entitled to registration of Applicant's Marks.

WHEREFORE, Apple requests that this opposition be sustained and that the registration of Application Serial Nos. 88/527,558 and 88/527,569 be denied.

The opposition fee in the amount of \$800.00 for a consolidated opposition is being submitted herewith. If for any reason this amount is insufficient, please charge any deficiency to Apple's attorneys' Deposit Account No. 20-1430. This paper is filed electronically.

Dated: May 26, 2020

Respectfully submitted,

Apple, Google Top The World's Most Valuable Brands Of 2016

Apple's 13-year run of quarterly revenue growth came to a crashing halt last month when the tech giant reported revenue of \$50.6 billion, off 13% thanks to soft iPhone sales and a slowdown in China. The gloom-and-doom sentiment around the company has reached a zenith with the stock off 30% from its all-time peak 12 months ago.

(AP Photo/Matthias Schrader, File)

But Forbes' annual study of the world's most valuable brands shows that Apple is still in a class by itself with a value of \$154.1 billion, 87% more than second-ranked Google. It is the sixth straight time Apple has finished first since Forbes began valuing the richest brands in 2010.

"Brands get their value from how customers perceive them," says David Reibstein, a professor of marketing and branding expert at the [University of Pennsylvania's Wharton School](#).

"What makes it valuable from a company perspective is that customers are willing to pay a higher price or are more likely to buy."

The Apple brand hits a home run on both fronts. Apple-philes will cry blasphemy, but Apple phones are not that distinct from the latest Samsung gadget, hence why the two companies are always suing each other. Yet, Apple commands a premium price and accounts for nearly half the smartphones sold in the U.S., along with 75 million sold globally during the December holiday quarter.

[The World's Most Valuable Brands 2016](#)

Apple dominates in a consumer tech industry where brand matters. Revenue fell in the latest quarter, but the release of the iPhone 7 will certainly have fans of the brand lining up for hours outside stores in the fall ahead of the unveiling. The adulation helped the company generate \$53 billion in net income last year.

“The chance to make a memory is the essence of brand marketing,” said a young [Steve Jobs](#) after co-founding Apple. The brand has done that by creating a connection with customers through music, phones and computing. It now wants to do the same in watches, TVs and payments with more categories, like autos, also on its radar.

No. 2 Google leapfrogged Microsoft this year and closed the gap on Apple with its brand value up 26% to \$82.5 billion (Apple’s brand rose 6%). Google became a division of the newly formed Alphabet last year, but the search engine brand is still the company’s bread-and-butter profit center subsidizing “Other Bets” like self-driving cars, Google Fiber, Calico and Nest, which lost \$3.6 billion last year.

People are much more likely to use Google than Bing even though the search results might not differ much because of the Google brand. Google has become the generic term for search, which is the ultimate in branding power. Reibstein is awed with how Google treats its logo, which he says is the “antithesis of what everybody teaches about branding.” Some companies employ brand police to track the use of their logos to ensure the proper fonts and colors. Not Google. It changes the logo on its homepage every day with a clever new doodle.

Rounding out the top five are Microsoft (\$75.2 billion), Coca-Cola (\$58.5 billion) and Facebook (\$52.6 billion).

[Full List: The World's Most Valuable](#)

Brands

Facebook, up 44%, is the fastest-growing brand in the top 100 for the second straight year. The number of active users has surged to 1.65 billion. The average user spends 50 minutes daily using Facebook and Instagram (our brand value excludes the financial impact of Instagram). New York Times [columnist James Stewart](#) notes that is more time than people spend reading (19 minutes), participating in sports and exercise (17 minutes) and socializing (4 minutes) combined. Time is the ultimate measure of brand engagement.

“Facebook keeps innovating and adding more and more functionally and features,” says Reibstein. “Companies are figuring out how to use Facebook, so their revenue is growing. The transformation with what they are doing with their core business is incredible.”

We considered more than 200 global brands to determine the final list of the world's 100 most valuable brands. The brands were required to have more than a token presence in the U.S., which knocked out some big brands like multinational telecom firm [Vodafone](#) and Chinese e-commerce giant [Alibaba](#). The top 100 includes product brands like Marlboro, owned by Altria and Philip Morris International, as well as brands marketed under their corporate name like McDonald's.

Forbes valued the brands on three years of earnings and allocated a percentage of those earnings based on the role brands play in each industry (e.g., high for luxury goods and beverages, low for airlines and oil companies). We applied the average price-to-earnings multiple over the past three years to these earnings to arrive at the final brand value (click [here](#) for the complete methodology).

The 100 most valuable brands span 16 countries and cross 19 broad industry categories. Brands from U.S.-based companies make up just over half the list with 52 brands. The next greatest number are from Germany (11 brands), Japan (8) and France (6). Tech brands are the most common with 17, including the top three. Financial services companies landed 13 brands in the top 100 led by American Express at No. 24. Other big industries included automotives (12) and consumer packaged goods (10), followed by luxury and retail, which both secured eight spots.

The biggest decliner was IBM, off 17% to \$41.4 billion and No. 7 overall. Big Blue has reported 16 straight quarters of revenue declines. Revenue in the latest quarter was the company's lowest in 14 years. "People have trouble defining what IBM is today," says Reibstein, who says the one thing that might save IBM is its artificial intelligence technology platform Watson, which the company is doubling down on by featuring the technology in its ad campaigns.

Seven brands cracked the top 100 for the first time led by CVS at No. 47 with a value of \$11.7 billion. The average brand rose 6% in value compared to 2015. The cumulative brand value of the top 100 is \$1.8 trillion with the cut-off at \$6.7 billion for No. 100 Costco.

Apple And Microsoft Head The World's Most Valuable Brands 2015

Leadership changes are challenging. They can be even tougher when an iconic company founder is replaced. Nike and Starbucks both stumbled after [Phil Knight](#) and [Howard Schultz](#) stepped down from leading their respective companies. [Steve Jobs](#) was ousted from Apple in 1985 and the company entered a near death spiral in the early 1990s. But Jobs returned in 1996 to lead the company to unprecedented heights. In Apple's latest transition, the train keeps on rolling under CEO Tim Cook, who replaced Jobs in 2011. "The brand promise with Apple is so strong and they continue to deliver on that," says Kevin Lane Keller, a branding expert and professor at Dartmouth's [Tuck School of Business](#).

[The World's Most Valuable Brands 2015](#)

The Apple brand is now worth \$145.3 billion by our count, up 17% over 2014. The brand ranks on top of Forbes' list of the World's Most Valuable Brands for a fifth straight time and is worth twice as much as any other brand on the planet. The company sold 74.8 million smartphones worldwide in the fourth quarter of 2014 with phone sales up 49%. It was the first quarter Apple sold more phones than Samsung since 2011 (Samsung regained its No. 1 position in the first quarter of 2015). Apple is making money hand over fist with an \$18 billion profit in the fourth quarter, up 33% from the prior year.

While Samsung spends nearly \$4 billion on advertising to sway consumers, Apple spent only one-third as much at \$1.2 billion last year. The company relies on its avid fan base more than Madison Avenue to promote its products.

Apple revolutionized four industries over the past 15 years with the launch of the iPhone, iPad, iPod and iTunes. Its next target is watches. The Apple Watch launched in April. Forecasts for first year sales are all over the map and typically range between eight million and 15 million. Analysts at Piper Jaffrey expect watches to represent 10% of Apple's 2017 revenue. Keller is skeptical of the potential of the Watch, but recognizes the incredible track record Apple has to produce great products. "If the watch turns out to be a success, it is going to fuel the company and brand even more," says Keller.

Microsoft ranks as the second most valuable brand worth \$69.3 billion, up 10%. After years of getting beaten up in the press and by users, the \$94-billion-in-sales company is suddenly [cool again](#) under CEO [Satya Nadella](#), just the company's third leader in 40 years. The company is intriguing developers and introducing captivating products like its HoloLens, a headset which brings hi-def holograms to life using Windows. "We want to move from people needing Windows to choosing Windows, to loving Windows. That is our bold goal," said Nadella at the Windows 10 launch event in January.

The company poured \$11 billion into research and development last year. Windows 10 will be released this summer and is expected to be the last major release of the venerable operating system. Future updates will be in an "ongoing manner." The company wants one billion Windows 10 users by 2018.

Microsoft is no longer the 800-pound gorilla in the tech space, which has softened some of the criticism, but Keller is looking for consumers to want to engage with the brand before he labels it cool again. "I can see why people have stopped hating them, but can't see why people would start loving them," says Keller.

Rounding out the top five are Google (\$65.6 billion), Coca-Cola (\$56 billion) and IBM (\$49.8 billion).

We determined the most valuable brands by starting with a universe of more than 200 global brands. We required brands to have at least some presence in the U.S., which knocked out big brands like Chinese internet giant [Tencent](#) and multinational telecom firm Vodafone. The top 100

includes product brands like Procter & Gamble-owned Gillette as well as brands marketed under their corporate name like IBM.

Forbes valued these brands on three years of earnings and allocated a percentage of those earnings based on the role brands play in each industry (e.g., high for luxury goods and beverages, low for airlines and oil companies). We applied the average price-to-earnings multiple over the past three years to these earnings to arrive at the final brand value (click [here](#) for the full methodology).

The 100 most valuable brands span 15 countries across 20 broad industry categories. Brands from U.S.-based companies make up just over half the list with the next biggest representation from Germany (9 brands), Japan (7) and France (7). Tech brands are the most prevalent with 15, including half of the top 20. Automotive and consumer packaged goods companies both landed 13 brands within the top 100. Toyota was the top auto brand at No. 8, worth \$37.8 billion, while Gillette headed the CPG brands at No. 26, worth \$20.4 billion.

[Facebook](#) registered the biggest gain of any brand in the top 100, up 54%. It cracks the top 10 for the first time with value of \$36.5 billion. Facebook had 936 million active daily users as of March 2015 with 83% of those outside the U.S. The brand has emerged as a competitor to YouTube regarding video. In April the company reported that it delivered four billion video views daily compared to one billion just seven months earlier. Other big gainers in the top 100 include: Amazon.com (+32%) and Disney (+26%). Adidas (-14%) and Danone (-13%) had the biggest drops.

Apple, Microsoft And Google Are World's Most Valuable Brands

[The World's Most Valuable Brands 2014](#)

A strong brand name is an incredibly valuable asset. Consumer companies in particular devote huge chunks of time and resources to solidify and expand their brands. “A valuable brand delivers a return for the company on two dimensions,” says David Reibstein, professor of marketing at the [University of Pennsylvania’s Wharton School](#). “Either it allows the company to charge a premium price or it adds more volume or market share.”

When it comes to charging a premium price and moving product, no one does it better than Apple. There are other phones and tablets that are functionally comparable or arguably better than the iPhone and iPad, but the Apple brand carries tremendous weight and credibility, and customers are willing to pay up for that. The company sold 39.3 million iPhones in its latest quarter and could sell as many as 60 million during the last three months of 2014 with the holiday selling season. Apple also moved 12.3 million iPads and 5.5 million Macs last quarter.

Add it all up and the Apple brand is worth \$124.2 billion and almost twice as much as any other brand in Forbes’ annual study of the world’s most valuable brands. The value of the Apple brand is up 19% over last year. Apple’s strong brand and innovative products allowed it to redefine four industry categories over the past 13 years with the launches of the iPhone, iPad, iPod and iTunes. The next industries on Apple’s hit list are smartwatches with the Watch and financial payments with Apple Pay. Premium pricing pushes up Apple’s operating profit margins to

33%, and the company generated \$50 billion in free cash flow for the fiscal year ended in September.

Microsoft ranks second with a value of \$63 billion, up 11% after being flat the previous three years, as the brand works to make the transition to a mobile world. Microsoft has recently had more success with its move away from the PC and software licensing model towards cloud offerings.

Microsoft inked a five-year, \$400 million sponsorship deal with the NFL last year. The pact requires the NFL to use Surface tablet computers on the sideline that download high-def photographs of plays as they occur. Unfortunately for Microsoft the arrangement has provided more evidence of the power of the Apple brand, as announcers and players repeatedly [refer to the Surface tablets](#) as iPads and one player called them “[knockoff iPads](#).” Microsoft is still a bit player in tablets and phones. “There is a lot of catching up to do,” says Reibstein. “They are going to have to work to overcome the brand disadvantage they have in those areas.”

Google shoots up two spots to No. 3 among the top brands with a value of \$56.6 billion, up 19%. Google is the generic term for the search category, but what separates Google from brands like Kleenex and Xerox is the amount of money it generates from its ad-driven business. The Google brand generated \$16 billion in earnings before interest and taxes over the last 12 months, and it is one of the biggest ad spenders in tech at \$2.8 billion in 2013. “With a well known brand, people trust it a lot more, and part of what is happening with Google is a matter of trust,” says Reibstein.

To determine the best brands, we started with a universe of more than 200 global brands. We required brands to have some presence in the U.S., which eliminated big brands like multinational telecom firm [Vodafone](#) and state-owned [China Mobile](#), which has almost twice as many mobile subscribers as any other brand (Vodafone is second in mobile). The final list includes product brands like Anheuser-Busch InBev-owned Budweiser and brands that are marketed under their corporate name like IBM, which ranks fifth overall.

Forbes valued the brands on three years of earnings and allocated a percentage of those earnings based on the role brands play in each

industry (e.g., high for luxury goods and beverages, low for airlines and oil companies). We applied the average price-to-earnings multiple over the past three years to these earnings to arrive at the final brand value (click [here](#) for the full methodology).

The 100 most valuable brands span 15 countries across 20 broad industry categories. Brands from U.S.-based companies make up just over half the list with the next biggest representation from Germany (9 brands), France (7) and Japan (5). Tech brands are the most prevalent with 16, including 11 of the top 25. Automotive companies landed 16 brands in the top 100 led by Toyota at No.9, worth \$31.3 billion.

Sandwiched around IBM are a couple of brands facing the challenges of people's changing eating and drinking habits, particularly in the U.S. Coca-Cola's value rose 2% to \$56.1 billion, placing it fourth. "When you are selling sugar and water, your brand better be very important," says Reibstein. The Coca-Cola brand is still extremely valuable, but it operates in an industry with few growth prospects. Coca-Cola sold 13.5 billion cases globally of its signature brand in 2013, up just 0.6% from the prior year. The McDonald's brand is sixth overall, worth \$39.9 billion, but up just 1%. McDonald's has been working to make its menu appear more health conscious, but many consumers aren't buying it. Global same-store sales slid 3.3% in the third quarter.

The biggest gainer in the top 100 was Facebook, up 74% for a value of \$23.7 billion and No. 18 overall. Various surveys report that fewer teens are using the social sharing site, but the Facebook brand still carries tremendous weight with 864 million daily active users in September. Revenue for the latest quarter jumped 59% with advertising representing 92.5% of total revenue. Other big gainers in the top 100 include Amazon.com (+45%), Starbucks (+25%), Toyota (+22%) and Nike (+22%).

Apple Dominates List Of The World's Most Valuable Brands

[The World's Most Valuable Brands](#)

Apple has set the bar incredibly high over the past decade. The expectations have some fans grumbling about the lack of transformational products during recent launches. The company has largely upgraded existing product lines instead of releasing anything as revolutionary as its last huge category changer in 2010, the iPad. Speculation swirls about whether the Cupertino, Calif.-based company has peaked, with well-funded competitors like Samsung and Google also challenging Apple. Wall Street seems to think so — Apple's stock plummeted 45% from its September 2012 high before partially recovering in the past six months.

But Forbes' study of the top brands illustrates that the Apple name is as strong as ever. Apple is the most valuable brand in the world for a third straight time at \$104.3 billion, up 20% over last year. It is worth nearly twice as much as any other brand on the planet by our count.

"The heart of a great brand is a great product," says Kevin Lane Keller, branding expert and professor at Dartmouth's [Tuck School of Business](#). Apple remains a vital part of people's everyday lives, and the brand continues to capture consumer's imaginations (and wallets) in a range of products across different industries.

The company sold a record 33.8 million iPhones in its latest quarter. It also moved 14.1 million iPads and 4.6 million Macs. Roughly 30 billion songs have been sold on iTunes since it launched in 2003. Sales of iPods are down, as people turn

to their phones as music players, but Apple still sold 3.5 million iPods in its fiscal fourth quarter and 26.4 million for the year.

Design has been a large contributor to the strength of the Apple brand. “Design is how a product works, how it looks, how it feels. It’s functional and aesthetic. Apple has embraced that in the fullest sense possible in terms of making products simple, but also good looking and attractive,” says Keller.

[Full List: The World's Most Valuable Brands](#)

Microsoft ranks second with a brand worth \$56.7 billion. The value of the brand is flat over the past three years, as Microsoft struggles to make the transition from a PC to a mobile world. Growth has slowed, but it is still one of the most profitable brands in the world with operating margins of 34% in its latest fiscal year. The company's \$2.6 billion ad budget is one of the biggest in tech.

Coca-Cola is the only non-tech brand to crack the top five, ranking No. 3 with a brand value of \$54.9 billion. Coca-Cola sold 13.5 billion cases of its signature drinks in 2012, up 3% from the prior year thanks to growth outside the U.S. Those sales represent half of the company's soda revenue. The brand became the first to record 50 million “likes” on Facebook last year and currently has 75 million fans on the social media site.

To determine the best brands, we started with a universe of more than 200 global brands. We required brands to have a presence in the U.S., which eliminated some big brands like multinational telecom firm [Vodafone](#) and state-owned [China Mobile](#), which is the world's largest mobile phone provider. The final list includes product brands like Procter & Gamble-owned Gillette and corporate brands like IBM, which ranks fourth.

Forbes valued the brands on three years of earnings and allocated a percentage of those earnings based on the role brands play in each industry (e.g., high for luxury goods, low for airlines). We applied the average price-to-earnings multiple over the past three years to these earnings to arrive at the final brand value (click [here](#) for the full methodology).

The 100 most valuable brands span 15 countries across 20 broad industry categories. Brands from U.S.-based companies make up just over half the list with the next biggest representation from Germany (9 brands), France (8) and Japan (7). Tech brands are the most prevalent with 19, including six of the top 10.

Ninth-ranked Samsung had the strongest one-year gain of any brand in the top 100, up 53% to \$29.5 billion. Samsung's value soared 136% over the past three years. Sales for Samsung's Galaxy S4 smartphone have been on fire and the company also benefits from its market leading position with memory chips. Samsung's smartphone shipments rose 40% to 81.2 million in the third quarter, according to IDC. Its 31.4% market share is larger than the next four brands combined.

Samsung has poured money into marketing, particularly in sports, to highlight its innovative products. South Korean-based Samsung Electronics has been an Olympic sponsor since the 1988 Seoul Olympic Games. It uses global sports stars like track and field's Usain Bolt and figure skater Kim Yu Na in its advertising. Samsung's most high profile sports team deal is its \$24 million a year jersey sponsorship of European soccer champion Chelsea. The company's ad budget hit \$4.4 billion last year.

"Really strong brands are highly innovative and highly relevant, so they are always moving forward in the right direction with products and services that really appeal to people and are distinctive and different," says Keller.

Samsung and Apple have been on remarkable runs, but they only need to look across the mobile space to see how quickly the value of a brand can collapse in the complex, fast moving technology world. Forbes valued the Blackberry brand at \$6.1 billion last year, but just \$2.2 billion this year and outside the top 100. Three years ago, Forbes deemed the Nokia brand worth \$27.3 billion, ninth highest in the world. Today we figure it is worth \$7 billion, which ranks No. 71. The value is down 55% from last year as the brand, like Blackberry, has been left behind in the smartphone world.

Nokia was the world's leading market of mobile phones for 14 years until early 2012, but they failed to read the market and adapt to the consumer's move to smartphones. Nokia still

ranks second behind Samsung in global shipments in the low-priced, stagnant mobile phone category with a 13.8% market share, according to IDC. But Nokia is almost irrelevant in the high-priced, exploding smartphone area. Nokia sold 8.8 million of its Lumia smartphones in the third quarter—up 19% from the prior year, but Samsung sold nine times as many smartphones with unit growth twice as fast. Keller isn't hopeful about a Nokia revival and adds, "In such a fast moving category and industry, it is murder to catch up once you fall behind."

Apple Tops List Of The World's Most Powerful Brands

[The World's Most Powerful Brands](#)

[Apple](#) has taken its lumps the past two weeks with the rollout of the iPhone 5. Customer complaints about the Maps app and phones that easily scratch sparked cries that these things never would have happened under [Steve Jobs](#)' watch. Is the Apple brand headed south? Not a chance.

Apple remains a leader in innovation that is adored by consumers around the world. The brand helped the company generate \$40 billion in profits over the past 12-months, second most in the world behind [Exxon Mobil](#). How do you measure the power of a brand? It is the combination of financial value and positive consumer sentiment and Apple has both in abundance, which puts the Apple brand on top of Forbes inaugural list of the World's Most Powerful Brands.

"Apple sets the pace, redefines categories and addresses our needs even before we realize we have them," says Billy Mann, managing director at consulting firm Penn Schoen Berland. Look at the phone market, which Apple did not even enter until 2007. The annual release of the updated iPhone is now the most anticipated event of the year in the telecom category. Apple sold more than five million iPhone 5 units in the first weekend it went on sale last month.

The Apple brand is worth \$87.1 billion by our count, up 52% from two years ago when [Forbes last valued the top brands](#). The Apple brand is worth 59% more than [Microsoft](#), which ranks No. 2 in brand value and overall.

The Microsoft brand is worth \$54.7 billion, as the company remains a financial juggernaut with operating profit margins of 42%. Microsoft spends \$1.6 billion annually on advertising, almost twice as much as Apple, to help get its message across. While Microsoft has been under fire, as Apple rocketed past it in market value and coolness factor, consumers still favor [Bill Gates'](#) baby. Microsoft ranked first in a global survey of brands on perception done for Forbes by consulting firms Landor Associates and Penn Schoen Berland. The study measured 130 brands on attributes such as innovation and quality and Microsoft scored highly on "invests in customers" and "addresses my unique needs."

"In an industry that transforms itself every year, Microsoft has been a leader for decades," says Mann. Apple surprisingly only ranked 11th on consumer perception among the top 100 brands, but its huge edge in brand value kept it ranked as the most powerful.

In Pictures: The World's Most Powerful Brands

Full Coverage: The World's Most Powerful Brands

We started with a universe of more than 200 global brands to determine the most powerful. We required brands to have more than a token presence in the U.S., which eliminated some big brands like Spanish retailer Zara and telecom firm China Mobile. Forbes valued the brands on three years of earnings and allocated a percentage of those earnings based on the role brands play in each industry (e.g., high for luxury goods, low for airlines). We applied the average price-to-earnings multiple over the past three years to these earnings to arrive at the final brand value.

We then turned to Landor and PSB to survey 2,000 global consumers on 130 brand names that Forbes valued at more than \$2.5 billion. The firms gauged consumer perceptions of the brands on a dozen attributes. Forbes combined the brand values with the consumer study to determine our power list, overweighting the former (click [here](#) for a detailed methodology).

The Coca-Cola brand ranked No. 3 overall with a value of \$50 billion and a rank of 29 among consumers. The company sold 26.7 billion cases of soda worldwide last year, with the Coca-Cola brand accounting for half of that. Sales for the

soda category have declined seven straight years in the U.S., but Coca-Cola is still the best-selling brand and a force globally. Retail sales for the brand topped \$1 billion in 18 different countries in 2011.

Technology brands dominate the top 100 with 24 making the cut. Tech giants secured the three slots after Coca-Cola with No. 4 IBM (brand value: \$48.5 billion), No. 5 Google (\$37.6 billion) and No. 6 Intel (\$32.3 billion).

Upstart tech brand, Facebook, is worth \$13.1 billion, which is 36th highest among all brands, but the social media site was crushed in the survey by Landor and PSB. Consumers dinged Facebook on the trust and transparency attributes, as well as on understanding and caring about customers. Clearly, privacy concerns remain a hot-button topic among Facebook's roughly one billion users. The brand ranked No. 99 with consumers among the top 100 with only Verizon faring worse. The poor consumer ratings knocked Facebook down to No. 73 overall on the power brands list.

Facebook made the top 100, but other valuable brands like Marlboro (\$15.3 billion), JPMorgan (\$13 billion) and Goldman Sachs (\$8 billion) failed to make the final cut, as a result of poor consumer scores. These three brands all ranked among the bottom five of the 130 surveyed by Landor and PSB.

Other less valuable brands got a bump up in the rankings thanks to consumer sentiment. The General Mills brand is worth \$3.5 billion, which is the in the bottom five of the 100 most powerful. But General Mills ranks No. 47 overall thanks to consumer sentiment that ranks second behind only Microsoft. "Consumers, especially Americans, trust, and find comfort in their food brands," says Mann. The maker of Cheerios and Wheaties scored highly on attributes like "makes communities a better place" and "cares about the issues that matter to me."

Apple Ranked the World's Most Valuable Brand, Followed by Google and IBM

Market Research firm Millward Brown has just published its 6th annual [BrandZ Global Top 100](#) rankings, and it turns out Apple has ended Google's four-year run as the world's most valuable brand.

Apple's brand value over the past year soared 84% to \$153 billion, as a result of meaningfully differentiated products the iPad and iPhone 4. Apple's success once again demonstrates that *a brand is neither an end in itself, nor a means to an end – but a byproduct of consistent delivery against a relevant tangible benefit*. The exception to this rule: brands in truly image-driven categories, where there's little to be had in the way of a tangible benefit, and none is expected (think soft drinks, beer or cigarettes).

Google's brand declined 2% to \$111.5 billion. Facebook made a giant leap onto the list, debuting at place 35, with a whopping 246% increase to \$19.1 billion.

Other top risers included Chinese search engine Baidu (141% to \$22.6 billion) and Wells Fargo, (97% to 36.9 billion).

The top 50 brands are below. A [full report](#) can be downloaded here (pdf).

The Harris Poll Announces This Year's Brands of the Year

 theharrispoll.com/the-harris-poll-announces-this-years-brands-of-the-year/

The Harris Poll's 31st annual EquiTrend Study reveals the strongest brands across the media, travel, financial, automotive, entertainment, retail, restaurant, technology, household and nonprofit industries, based on consumer response.

NEW YORK, April 15, 2019 –

Measuring brand health over time, the EquiTrend Brand Equity Index is comprised of three factors – Familiarity, Quality and Purchase Consideration – that results in a brand equity rating for each brand. Brands ranking highest in equity receive the Harris Poll EquiTrend “Brand of the Year” award for their respective categories. This year, more than 45,000 US consumers assessed nearly 2,000 brands across 196 categories.

“This year we added nearly 100 new brands across 11 new categories from voice-assistants to wearable tech. Yet the common thread that runs across all the brands awarded here is their consumer devotion and respect for —and expectation of —performance.” says The

Harris Poll CEO, John Gerzema. "These are brands Americans especially love and expect great things from in the future."

The Harris Poll 2019 EquiTrend Brands of the Year

This year, the 31st year that the Harris Poll has been measuring brand equity, 91 companies were awarded the coveted Brand of the Year designation across 87 categories.

Travel	Online Travel Service	TripAdvisor
Travel	Premium Hotel	Marriott Hotels
Travel	Upscale Hotel	Courtyard Marriott
Travel	Value Airline	Southwest Airlines

Methodology

The 2019 Harris Poll EquiTrend Study is based on a sample of 45,541 US consumers ages 15 and over surveyed online, in English, in the month of January. The survey took an average of 30 minutes to complete. The total number of brands rated was 1,985. Each respondent was asked to rate a total of 40 randomly selected brands. Each brand received approximately 1,000 ratings. Data was weighted to be representative of the entire U.S. population of consumers ages 15 and over based on age by sex, education, race/ethnicity, region, income, and data from respondents ages 18 and over were also weighted for their propensity to be online. Respondents for this survey were selected from among those who have agreed to participate in Harris Poll surveys. Because the sample is based on those who agreed to participate in our panel, no estimates of theoretical sampling error can be calculated.

The Brand Equity Index is the keystone to the EquiTrend program, providing an understanding of a brand's overall strength. A brand's Equity is determined by a calculation of Familiarity, Quality and Purchase Consideration. Brand of the Year is determined by a simple ranking of brands.

The Harris Poll EquiTrend methodology has been validated by academic business experts in the *Journal of Marketing Research* (1994) and *International Journal of Research on Marketing* (2012).

These statements conform to the principles of disclosure of the National Council on Public Polls.

About The Harris Poll

The Harris Poll is one of the longest-running surveys in the U.S. tracking public opinion, motivations and social sentiment since 1963 that is now part of Harris Insights & Analytics, a global consulting and market research firm that delivers social intelligence for transformational times. The Harris Poll works with clients in three primary areas; building twenty-first-century corporate reputation, crafting brand strategy and performance tracking, and earning organic media through public relations research. Apple holds the top spot for the eighth year in a row. In February, it became the first company to hit more than \$700 billion in market value. As tech devotees await the launch of the Apple Watch in April, record smartphone sales were announced in January — 74.5 million phones in final three months of 2014— proving that the iPhone is still the product to beat.

USA			www.apple.com	

The iconic tech company known for the iPhone and other stylish and user-friendly products is back in the top spot on this year's list, for the seventh year in a row. Apple, the most valuable brand on the planet according to Interbrand, brought in \$171 billion in revenues in FY2013 and is flush with cash, but fan boys and girls (not to mention the market) are getting antsy to see its next big product. Bets are on a smartwatch or AppleTV, but the company is also reportedly turning its attention to cars and medical devices.

Top 50 rank: 1**Rank in Computers: 1**

(Previous rank: 1)

Overall score: 8.24**Ticker:**[AAPL](#)**Why it's admired:**

Apple has had a rough time lately with its stock price in a free fall and the widely publicized failure of its Maps feature. However, it remains a financial juggernaut, posting \$13 billion in net income last quarter, making it the most profitable company in the world during that period. The company has its fanatical customer base, and it still refuses to compete on price, making the iconic iPhone and iPad products that are still widely seen as prestige devices. Competition may be stiff, but so far it remains behind: In Q4 2012, the iPhone 5 was the world's best selling smartphone, followed in second place by the iPhone 4S. *â€”iOA*

Why it's admired

For the fourth straight year, Apple tops Fortune's Most Admired list. The company's blistering pace of new product releases has continued to set the bar high for tech companies across the board.

Apple took a stock hit when iconic CEO Steve Jobs announced in January that he'd be taking a second medical leave, two years after receiving a liver transplant during a six-month sabbatical. But Jobs assured the market in the company's recent earnings report that Apple was still "firing on all cylinders."

It certainly appears to be. Apple nearly doubled its quarterly profits vs. a year ago. The iPad 2 was introduced in March, marking the second generation of one of Apple's milestone product successes. And Jobs made a surprise appearance at the launch.

Another huge move by Apple was the announcement this January that the iPhone 4 would be available from Verizon, offering another option to consumers frustrated with dropped calls on AT&T.

Overall score: 7.95

Why it's admired

Steve Jobs does it again: Apple is keeping its Most Admired crown for the third year in a row. With 250 million iPods, 43 million iPhones, and 32 million iPod touches sold to date, plus the promise of a game-changing iPad, Apple won this year's vote by the highest margin ever for a No. 1. Two more years as champ and Apple will match GE for most appearances in the top spot. What makes Apple so admired? Product, product, product. This is the company that changed the way we do everything from buy music to design products to engage with the world around us. Its track record for innovation and fierce consumer loyalty translates into tremendous respect across business' highest ranks. As BMW CEO Norbert Reithofer puts it, "The whole world held its breath before the iPad was announced. That's brand management at its very best." --*Christopher Tkaczyk*

Why it's admired

It's been a rocky year for Apple: CEO Steve Jobs' health made headlines, and critics said Cupertino wasn't being open enough about it. But customers remained loyal to the brand that made white ear buds cool. As much of the computer industry struggled, Apple shipped 22.7 million iPods during its first quarter (up 3 percent from last year), 2.5 million Macs (up 9 percent), and 4.4 million iPhones. No wonder Apple tops our Most Admired list for the second year in a row. --Alyssa Abkowitz

AMERICA'S MOST ADMIRABLE COMPANIES 2008

Top 20 Most Admired Companies

To create the top 20, Fortune and its survey partners at Hay Group asked the experts -- in this case, more than 3,700 people from dozens of industries -- to select the 10 companies they admire most. This year's winners all have strong records of innovation, leadership, and financial strength -- and their employees know it.

[< BACK](#) [NEXT >](#) 1 of 20

Apple

Top 20 rank: 1
Rank in Computers: 1

It is a tribute to its CEO that Apple, which ten years ago seemed headed for the slag heap, is No. 1 on this list. Steve Jobs has always had a knack for weaving magic out of silicon and software. But who knew he could build a \$24 billion (in sales) company on the strength of a portable jukebox and a computer with a single-digit market share?

His pitch, as he leveraged the success of the iPod, was very simple: Apple products work, and if you buy more than one, they work better. The company (if not its stock) is on a tear, but even with the economy weakening, it will be interesting to see how economically sensitive this growth engine is. -Philip Elmer-DeWitt

Apple and ConnectED

Giving products, support, and opportunities to schools that need them most.

Apple has been part of the ConnectED initiative since 2014, pledging \$100 million of teaching and learning solutions to 114 underserved schools across the country. We've donated an iPad to every student, a Mac and iPad to every teacher, and an Apple TV to every classroom. And we've implemented a process that provides planning, professional learning, and ongoing guidance so every school can experience the transformational power of technology.

[Learn more about the impact of the initiative in SRI Education's research report ↗](#)

Establishing Goals

"We all met to come up with our vision, mission statement, goals, and challenges."

Every school faces unique challenges. That's why we meet with administrators from each Apple ConnectED school to craft a vision for the role of technology in their classrooms. As part of this planning, we work with school leadership to form a core group of individuals responsible for defining clear and measurable goals.

At Berkley Campostella Early Childhood Education Center in Norfolk, Virginia, Principal Dr. Doreatha White leads her faculty with a powerful vision — that children are capable of anything if you give them the right tools. "Our motto is: College begins in prekindergarten," she says. "We have to guide a student's whole thinking toward being successful beyond pre-K. But to truly start closing the digital divide, we have to get our parents and the community to believe in what we're doing as well."

With that challenge in mind, Dr. White created a community outreach program to help parents understand the transformative power of technology in learning. And one of her first goals was to get 100 percent of the students' parents to attend How to Use iPad with Your Child workshops, which she achieved with surprising ease. "In the community's eyes, it was a big thing. We could demonstrate how this would benefit their children and prepare them for lifelong learning. That not only are they doing ABCs and 123s, they're also learning how to analyze and synthesize instruction. And now they're excited about learning, which they'll remember going into kindergarten and beyond."

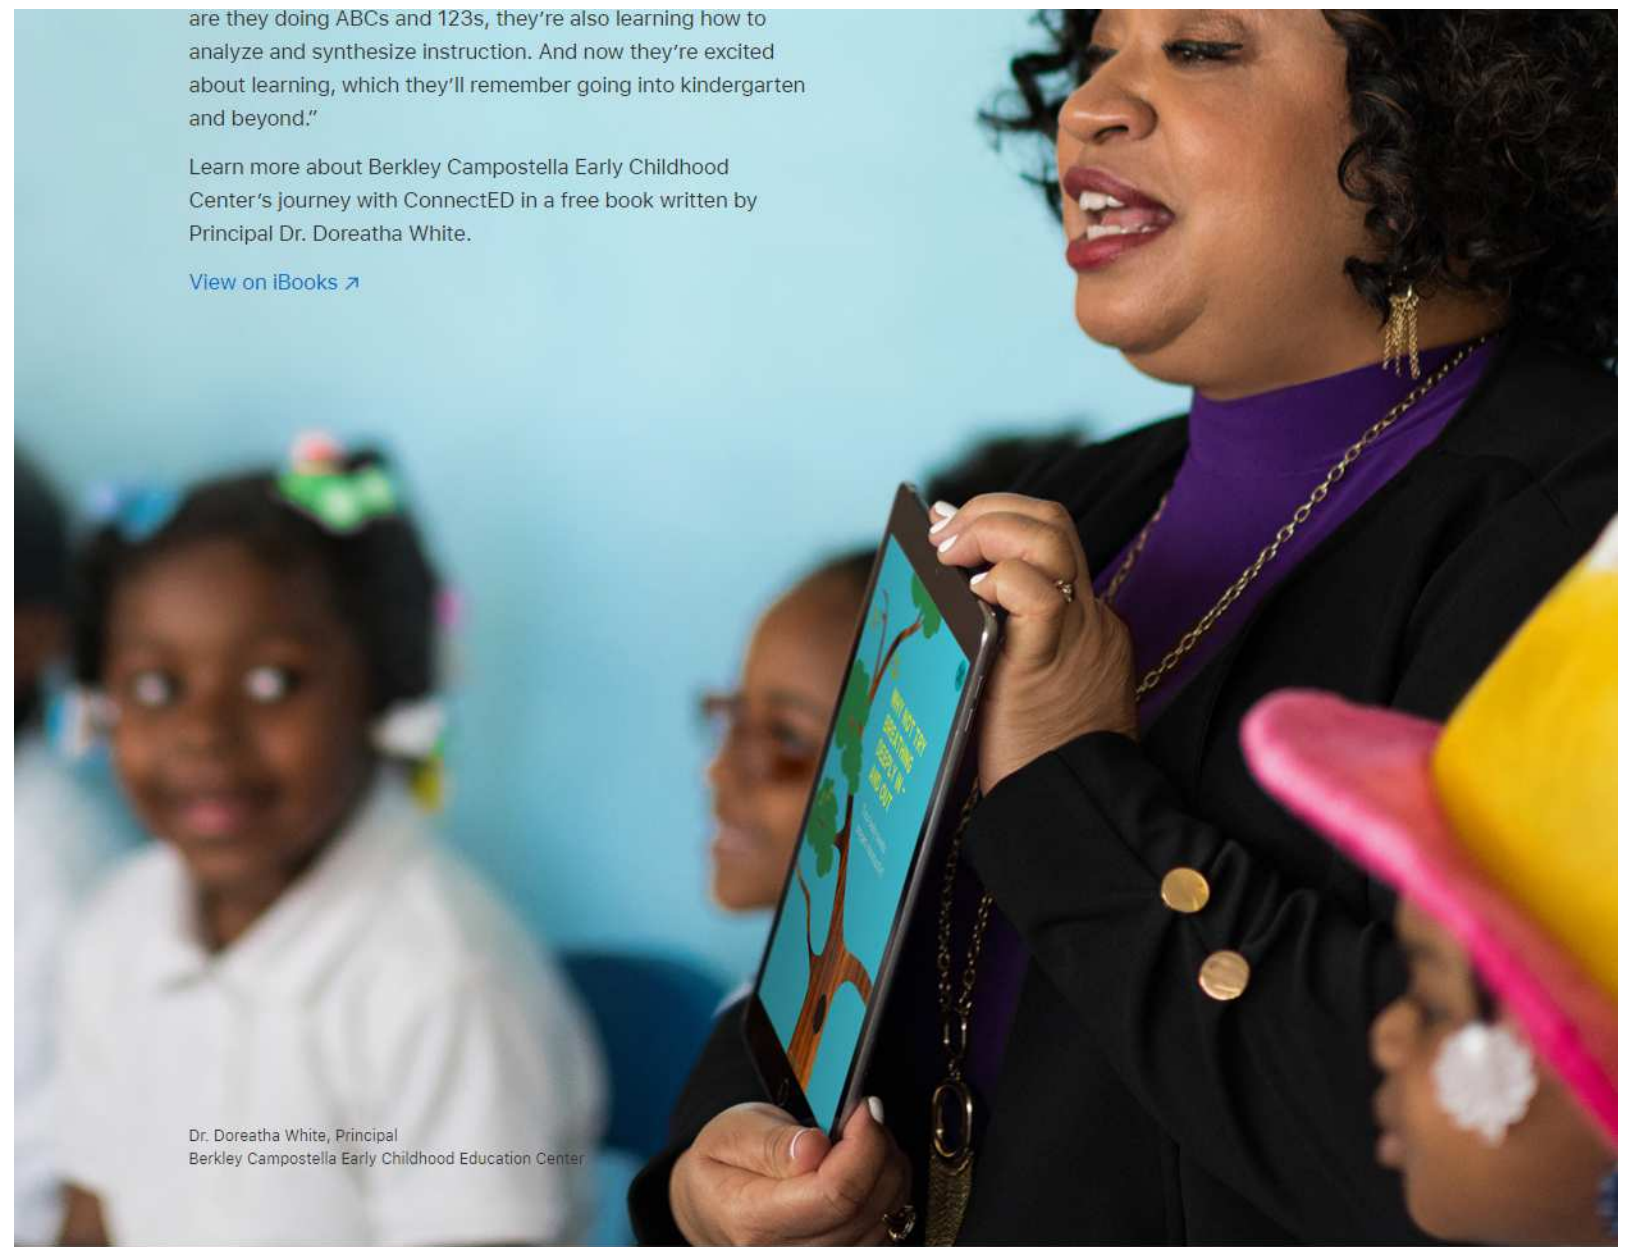

Learn more about Berkley Campostella Early Childhood Center's journey with ConnectED in a free book written by Principal Dr. Doreatha White.

Building Infrastructure

"If you can understand the system, you can maintain it."

Many Apple ConnectED schools do not have a strong network or a dedicated technology department. So before any products are delivered, Apple Project Engineers conduct a full survey of the school's existing wireless infrastructure and help install or upgrade a network.

760,320

Many Apple ConnectED schools do not have a strong network or a dedicated technology department. So before any products are delivered, Apple Project Engineers conduct a full survey of the school's existing wireless infrastructure and help install or upgrade a network.

In the remote village of Nanwalek, Alaska, the K-12 school was making plans to improve its slow, satellite-provided Internet connection. Our engineers consulted with district officials to ensure that the school's wireless infrastructure would not only be fast, but would also be ready to support the arrival of over 100 new Apple products. In addition to working with the district's offsite IT team, Apple Project Managers needed to find someone local to handle day-to-day management of the devices. Tommy Evans, an aide and parent in the village, volunteered for the role. "They showed us where a signal goes and how to tailor equipment around students' needs," he says. "When things were put in place, it took off like a rocket."

The new wireless infrastructure has profoundly affected the school, especially students like Evans's daughter, Tessie, who is hearing impaired. "Because we're so isolated, she felt like she was the only one who is deaf." But soon, Tessie was using FaceTime and other iPad apps to communicate with students and mentors all over the world.

Learn more about how access to technology connected Nanwalek students to the world beyond their shores in a free book written by Principal Nancy Kleine.

Preparing Teachers

**"I've had to slow down
because I get so excited
about all you can do."**

To help every teacher become comfortable with new technology, the Apple Education team provides a series of workshops designed specifically for educators. We start by helping them integrate iPad, Mac, and Apple TV into their curriculum and lessons, then show them how to create original and engaging books, presentations, and other learning materials.

"Apple made sure not to overwhelm us," says Kirt Gordon, a third-grade teacher at Salida del Sol Elementary School in Yuma, Arizona. "We could approach each session in small segments, enabling those of us who were further along to advance on our own."

Inspired by his professional learning workshops and the agricultural community that surrounds the school, Gordon teaches a lesson about the Archimedes screw, an irrigation device invented in ancient Greece. Using animated simulations in apps, the lesson enables students to rotate iPad for a 3D look at how the machine works so they can create models of their own.

In 2017, Gordon became part of the Apple Distinguished Educators (ADE) program, which celebrates pioneers of classroom technology. He is one of 13 ConnectED teachers to

Delivering Devices to Students

**"When something's on iPad,
it's automatically fun "**

"When something's on iPad, it's automatically fun."

With a strong infrastructure and inspired teachers, schools are ready to put an iPad into each student's hands.

All over the country, students at Apple ConnectED schools are using iPad to learn in ways they never could have imagined. Daveon was a ninth-grader at Riverview Gardens High School in St. Louis, Missouri, when he used iMovie on his new iPad to direct a documentary about the misconceptions surrounding his school and community, narrated by teachers and fellow students. Creating the film gave Daveon a way to share his perspective publicly. "It was like I stepped into a new reality," he said.

In Mr. Nunez's Language Arts class in Yuma, Arizona, students are learning about rhyme and meter by directing and recording screenplays using GarageBand. Tyrell, who was a sixth-grader at Westview Middle School in St. Louis, created a multimedia presentation in Keynote about the Bahamas after he used Flyover in Maps to take a tour of the islands. And in Nanwalek, Alaska, a student named Severan discovered how important math is in pursuing his dream of being a pilot. He used apps like IXL and Notes to learn about angles and multiplication tables, concepts he planned to put into action flying supplies and people to his village.

Providing Ongoing Support

"It's not just 'Here are the devices, figure out how to use them.' We're learning how to do it for life."

After each student receives an iPad, we continue building
relationships with the schools. Apple Professional Learning

0 100

use them. We're learning how to do it for life."

After each student receives an iPad, we continue building relationships with the schools. Apple Professional Learning Specialists, many of whom are former teachers and maintain teaching certificates, provide administrators, teachers, and students with tailored, onsite support and guidance to help them reach their goals. We also support teachers with online classroom workshops taught by Apple Distinguished Educators and Apple Retail team members. And with Apple Teacher, educators have a free, self-paced learning program to build skills on iPad and Mac.

At Westview Middle School in St. Louis, Missouri, eighth-grade teacher Brandon Small's relationship with his Apple Professional Learning Specialist continues to evolve. At first, his APL Specialist was a resource for questions about his new technology. "It was nice sitting down with an expert on Keynote and Pages to learn everything about them," he remembers. "It gave us something we could use right away in the classroom."

Now Small looks to his APL Specialist for ideas to enhance his lessons and his students' learning. Through a series of workshops, he's discovering how other apps can help him incorporate interactive games, graphs, and films into his classes. "They're giving us support and we're learning. It's not a one-time thing," says Small. "The learning keeps getting better."

Training by us. Recognized by the world.

Apple-certified training is an investment in your career that will be recognized wherever you go.

Certifications

macOS Support Essentials

The Apple Certified Support Professional (ACSP) certification is for the help desk professional, technical coordinator, or power user who manages networks or provides technical support for Mac users. ACSP certification verifies that you understand macOS core functionality and that you can configure key services, perform basic troubleshooting, and support multiple Mac users.

The macOS Support Essentials exam is computer based and offered at Apple Authorized Training Provider

Pro Apps

Apple Certified Professional certifications are for the creative professional using Final Cut Pro X or Logic Pro X. These certifications distinguish the learner as a skilled user, and provide a competitive edge in today's ever-changing job market.

The Final Cut Pro X and Logic Pro X exams are computer based and offered at AATP locations worldwide.

Resources

Apple digital badges

An Apple digital badge is an online representation of an outcome or achievement. It's a secure, shareable credential. Apple badges adhere to the Open Badges Specification, which is managed by the IMS Global Learning Consortium for recognizing and validating learning. Eligibility to earn a badge varies by geographical area and is determined by Apple and Apple's partners.

Certification records

After passing your exam and earning your certification, you will receive an email about your certificate. You will also be invited to log into the Apple Certification Records System (ACRS), where you can opt in to display your Apple Certification(s) on the Apple Certified Professionals Registry.

[ACRS](#) ➤

Legal information

Participation in Apple Training and Certification Programs is subject to your adherence and acceptance to the Program Policies in effect at the time you participate in the relevant exam or training.

[Review agreement and policies](#) ➤

Apple Identity Guidelines

The Apple identity is a seal of approval and a promise of excellence. When you are authorized or certified in your area of business or expertise, you also represent Apple. By following these guidelines, you reap the benefits of the Apple identity and contribute to its strength.
